

5 CLAIMS MANAGEMENT MUST-HAVES FOR 2021

1 Single sign-in access to all payers

1

Logging in and out of payer sites and systems is a significant time drain. Employees should be able to sign in once and go about their work.

2 Simpler, faster corrections

2

Everybody makes mistakes. Click-to-fix corrections and direct resubmissions ensure that those mistakes don't impact your bottom line.

3 End-to-end integration

3

From eligibility and claims to status, reporting and remits, using a [single integrated platform](#) eliminates the revenue slowdown and mistakes that are all too common when toggling between systems and screens.

5 Proven track record

5

Is your claims management solution integrated? Or is it two (or more) separate systems that have been recently cobbled together? ABILITY's [decades-long record](#) of simplifying claims management makes the difference.

Fully integrated, all-claims platform

MEDICARE • MEDICAID • PRIVATE PAYERS

4 Real-time status checks

4

These days, just about everything is available in real time. Claims status checks should be too. Real-time Medicare data allows you to see DDE status directly in your clearinghouse.
