

ARE YOU STILL USING

Paper-Based or Spreadsheet

TOOLS FOR SCHEDULING YOUR STAFF?

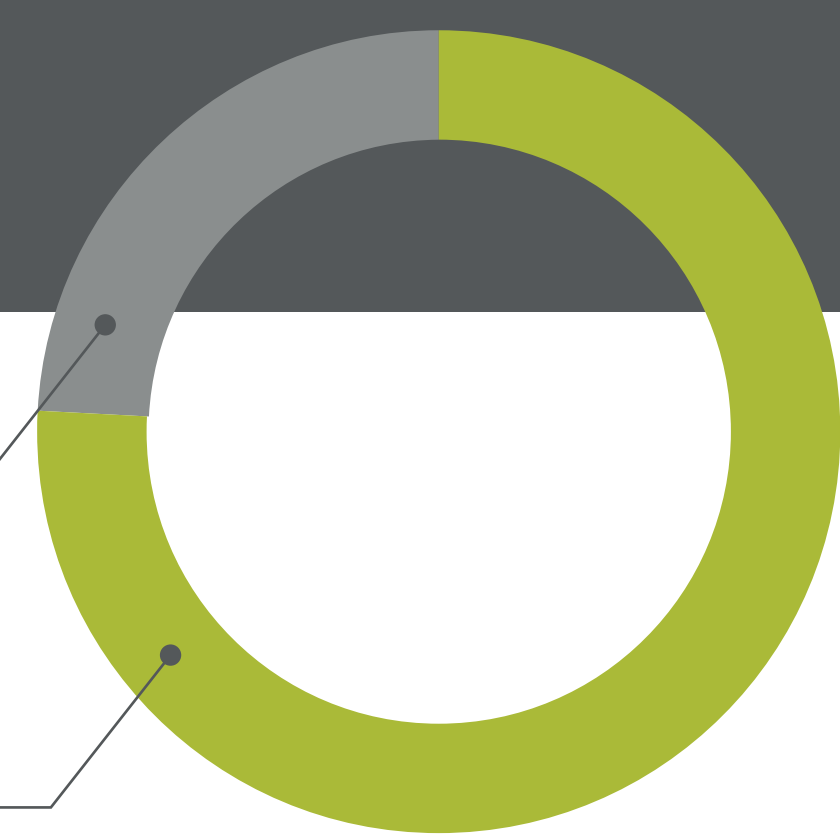

Healthcare organizations face increasing pressure to provide high-quality patient care while managing labor costs and addressing retention and turnover.

Research shows that many healthcare settings have not taken advantage of the impact that new scheduling technologies can have on cost-effective workforce management.¹

Many organizations are using antiquated methods

23% don't use any scheduling tools at all

73% of senior care organizations still use paper-based or spreadsheet tools

Lack of staffing automation is expensive

\$ Automated staffing technology can result in a **4-7%** savings in overall labor spending

Staff account for **60%** of hospital operating costs

Nearly **50%** of nurse managers say understaffing is a significant problem in their organization

Automated scheduling can lead to happier employees and improve retention

Nursing turnover costs the average hospital up to **8.1 MILLION** EACH YEAR

55% of millennials are not engaged at work

36% of millennials plan to change jobs in the next year

94% of nurse managers say that scheduling and staffing problems negatively affect overall staff morale

Nurses who use automated staffing technology express increased job satisfaction

Staff who have the flexibility to create their own work schedules report better work-life balance, job satisfaction, and social support, and are less likely to swap shifts
