

How Can We Help Improve Mental Health for All?

In the midst of a national mental health crisis, providers are struggling to better serve their patients. Revenue cycle management challenges negatively impact the patient experience and providers' bottom line.

Top provider concerns

86% report observing examples of worsening patient health and social conditions, including higher levels of mental health concerns.¹

Despite high demand,

45% of U.S psychiatrists do not accept any form of health insurance.²

48% say identifying errors before claims submission is the biggest claims management challenge.³

It doesn't have to be this way. According to recent research, **85%** of claims denials are avoidable.⁴

Automated revenue cycle management can help providers:

Reclaim your time
by automating RCM processes

Increase patient access
by accepting insurance plans

Accelerate reimbursements
by reducing denials and write-offs

Simplify claims submissions
with batch eligibility verifications

Discover how [automated claims management](#) helped one psychotherapist grow her practice.

“With [Inovalon], I know I can expect to be paid consistently and quickly. I know that the claims are correct and accurate, and the platform just works really well and really quickly. Whenever I have delays, it's almost always because of something on the payer's end.”
