

Converged Provider Enablement

Translate organizational goals to the provider point of care for better outcomes

Improve patient outcomes and provider engagement while enhancing performance and eliminating the complexity of managing overlapping federal, state-specific, and localized quality, risk, and custom value-based initiatives.

Converged Provider Enablement empowers health plans, “payviders,” and other value-based healthcare organizations with a single SaaS solution that makes it easy to coordinate countless programs and initiatives across large provider systems at the point of care.

- **Enable and engage providers:** Translate differing initiatives into one set of patient-specific insights and goals delivered to individual providers at the point of care and updated in real time
- **Enhance transparency and maximize incentives:** Gain accurate, system-wide transparency into the ongoing performance of your initiatives and how to hone programs and incentives for greater effectiveness
- **Streamline management of all initiatives with one solution:** From standard federal and state-level initiatives to fully customized goals, improve quality outcomes, risk score accuracy, population health, and more

KEY DIFFERENTIATORS

80%+
of nation's quality analytics performed by underlying platform

Application Features

Reduce manual errors and administrative costs with self-service configuration tools, certify-before-publish features, and custom patient attribution and provider hierarchy settings.

Quickly deliver performance metrics to provider partners via easy-to-use dashboards with secure data integration, accurate analytics, and single sign-on capabilities.

Inform programs with an integrated view across quality, disease burden, care management, and utilization metrics with actionable measure, provider, and patient specific insights.

Design and share custom measures with providers to support organizational initiatives on strategic priorities such as surgical outcomes, cancer screening, vaccine adherence, and more.

Engage providers to close patient gaps and advance priority initiatives through an interface that delivers clear guidance on goals supported by timely, actionable data.

Access comprehensive performance benchmarking to understand how healthcare organization and individual provider performance compares against peers and program targets.

Minimal implementation required for health plans already connected to the Inovalon ONE® Platform.
