

Claims Management Pro: Accelerate Your Revenue Cycle With Electronic Claims Attachments

Are paper attachments slowing down your claims management and delaying revenue capture? Payers often require attachments, but many claims management applications don't have the capability to handle them. This leaves billing staff with additional tasks – printing, attaching, and mailing claims that could otherwise be submitted electronically.

**This all-too-common issue creates significant delays in A/R
and can cost healthcare providers a lot of revenue.
There's a better way!**

With [Claims Management Pro](#), providers can skip the hassle and accelerate their revenue cycles. Electronic attachment and print-and-mail capabilities remove tedious tasks from the claims management process while increasing claims accuracy. You could enjoy shorter A/R cycles and a clean claims rate of 99% or better.¹

Eliminate A/R delays with electronic claims attachments

With Claims Management Pro, you can:

Save time by easily identifying claims that require attachments.

Increase efficiency with electronic claims submissions and attachments.

Eliminate repetitive tasks with quick and simple file uploads for all attached documents.

Accelerate A/R with streamlined claims processes and easy tracking of all electronically submitted claims.

And, if you have claims that require paper attachments, Inovalon can take care of those for you, too, with print-and-mail capabilities through **Claims Management Pro**.

Ready to Accelerate Your Revenue Cycle?
