

How Billing Services Improve Cash Flow Across Healthcare Specialties

Obstacles Slow Revenue

74%

of specialty healthcare providers consider claims denials an important or top challenge.¹

43%

of healthcare professionals believe that patient payments and collections are among the most important challenges to tackle.¹

Working with a trusted technology partner helps billing services organizations optimize results across the revenue cycle, including:

Insurance benefits verification

Coverage discovery

Trends analysis

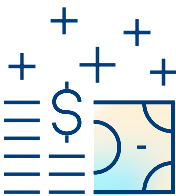

Claims status management

Claims edits and resubmissions

Technology Strengthens Outcomes

\$10,000+

“Tens of thousands of dollars in revenue reimbursement” achieved by an Inovalon billing services partner, in addition to fewer claims denials and greater efficiency.²

98.5%

The clean claims rate increase of 6.5% achieved by a medical billing company, up from 92% previously.³

Equipped with the right technology, billing services providers can easily:

Simplify claims submissions with batch eligibility verifications

Uncover missing revenue with data to improve cash flow

Accelerate A/R days with more clean claims and fewer denials

Ready to unburden physicians, improve the patient experience, and lead the way to fuller reimbursements? Schedule a complementary consultation with our billing services experts today.
