

5 Signs It's Time To Evaluate Your Medicare Billing Process

If you're struggling to untangle the Medicare billing web, it might be time for a technology update. Learn more in this infographic.

To optimize your financial performance, it's crucial to capture **100% of the Medicare revenue you've earned.**

If one or more of the following are true, it might be time to reassess how you manage Medicare billing.

Staffing challenges

You're having trouble hiring workers with the right skills

Manual tasks

Your billing staff are bogged down with tedious, repetitive work

Outdated technology

You submit claims through DDE or another cumbersome system

Revenue blind spots

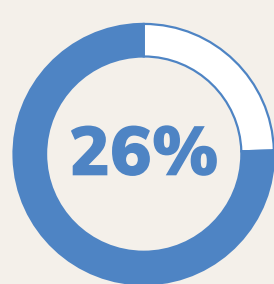

You lack the ability to accurately forecast Medicare cash flow

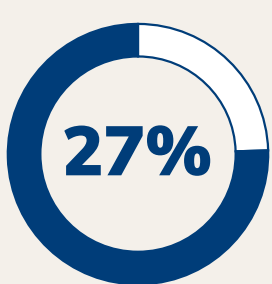

Financial struggles

Financial recovery is overshadowing your focus on revenue generation

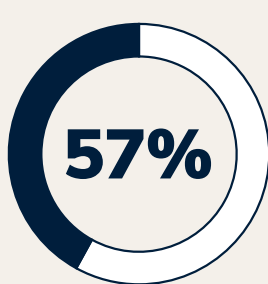

Nodding your head? You're not alone.

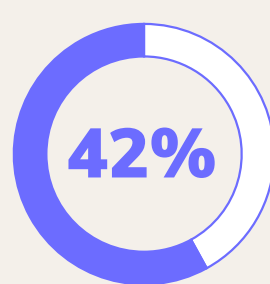

Of providers do not receive alerts about issues with Medicare claims¹

Of providers use a clearinghouse or EDI vendor to identify and correct issues with Medicare claims¹

Of providers that feel they would benefit from greater visibility and control of their Medicare revenue cycle¹

Of providers work directly in FISS/DDE to identify and correct issues with Medicare claims¹

30+ Keystrokes required to correct a claim in DDE

Transform how you manage Medicare claims with a cloud-based billing system.

Reduce complexity for billing and administrative employees

Gain full visibility of Medicare payments

Save time by automating manual tasks

Strengthen overall financial health

Simplify workflows with a user-friendly interface

Claims Management Medicare Pro is a cloud-based RCM tool that helps providers automate their Medicare billing management.

Verify eligibility

Monitor for changes with automatic weekly checks

Keep claims moving

Stay abreast of status changes and receive alerts for at-risk claims

Simplify corrections

Easily fix rejected claims and submit required documentation

Correct a claim in just 8 keystrokes

Claims Management Medicare Pro has given me more time during the day, especially with processing returned or rejected claims. Because the application clearly tells you where the issue is, it makes correcting and resubmitting the claims quick and easy. It is a night and day difference versus going to the DDE/FISS directly to repair claims for resubmission. This frees up my time on other important projects.
