

Reimagine Staff Scheduling

Schedule Management offers quick, efficient, streamlined healthcare scheduling

The Challenges of Outdated Scheduling

Labor-intensive

Scheduling can take hours to complete, only to demand constant updates as needs shift

Error-prone

Limited schedule visibility leads to costly overtime, under- and over-staffing, and other avoidable errors

Disorganized

Spreadsheets and other manual processes make it difficult to make quick, data-driven decisions

Morale-busting

Poor shift management, combined with a lack of input and flexibility, can lead to low employee morale

A Smarter Way to Schedule Staff

Predictive analytics

Project census trends and align staffing needs

Union-based scheduling

Adhere to labor contracts and satisfy hour requirements

Overtime insights

Reduce labor costs and boost morale with real-time overtime data

Position management

Understand your staffing needs across licenses, locations, and associated costs

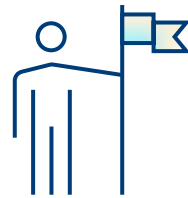

Staff

- View your schedule from any device
- Receive text or email notifications when shifts open or the schedule changes
- Request time off or shift swaps and volunteer for open shifts
- Be an active participant in the scheduling process
- Sync your work schedule to your personal calendar

Managers

- Gain the 24/7 visibility required to make smart, fast staffing decisions
- Fill open shifts in minutes with quick and efficient mass communication
- Manage staff-to-patient ratios with a convenient quick-look staffing grid
- Prevent overtime with reporting built just for this
- Improve staff engagement and retention

Leadership

- Stay informed with highly intuitive executive dashboards and push reports
- Gain an eagle-eye view of departments, shifts, employees, risk areas, and budget impacts
- Pinpoint and proactively address overtime misuse
- Onboard your entire staff with minimal training – in two weeks
