

# Break the Bottleneck: AI-Driven Recruitment for Faster Clinical Trials

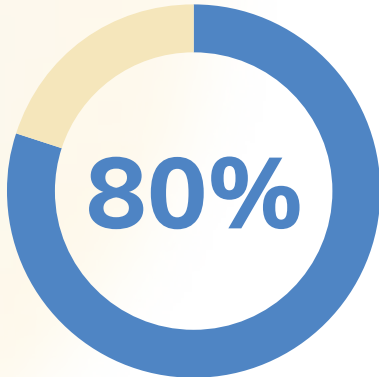

Every missed enrollment deadline isn't just a delay – it's a financial hundra and a life-threatening setback for patients waiting on new treatments.

AI-powered recruitment changes that – automating patient matching, removing barriers, and accelerating enrollment so trials stay on track.

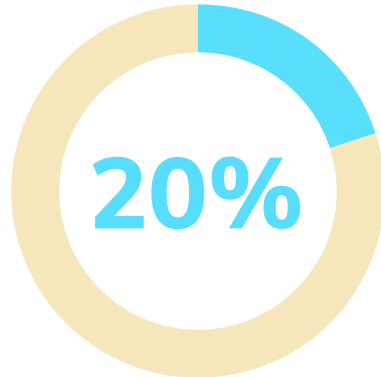

## Clinical Trials Are Stuck in Slow Motion

of trials fail to meet enrollment targets on time<sup>1</sup>

of trials miss initial enrollment goals and timelines<sup>2</sup>

of clinical trials are terminated early due to insufficient enrollment<sup>3</sup>

## The Hidden Costs of Slow Recruitment

**\$500,000+**

lost per day due to delays<sup>4</sup>

**\$5M+**

added costs for every 3-month Phase III delay (~\$55,000/day)<sup>4</sup>

**BILLIONS**

lost in revenue from delayed market entry<sup>5</sup>

## The 5 Biggest Enrollment Roadblocks

### Strict Eligibility Criteria

Complex inclusion/exclusion criteria shrink the patient pool

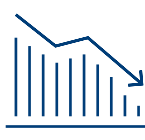

### Data Silos

Manual pre-screening is slow and inefficient

### Limited Awareness

Many eligible patients never hear about trials<sup>1</sup>

### Poor Retention

85% of trials fail to keep enough patients enrolled<sup>2</sup>

### Geographic Barriers

70% of patients live 2+ hours from a trial site<sup>2</sup>

## AI-Powered Recruitment: The Fast Lane to Enrollment

No more recruitment bottlenecks. No more delays. Inovalon's Clinical Research Patient Finder™ matches eligible patients instantly – so your trial moves faster, with less effort.

### ► Find Patients in Minutes

Monitor the EHR 24/7 for potential eligibility

### ► Expand Your Patient Pool

Detect and resolve eligibility roadblocks in real time

### ► Gain Full-Site Visibility

Track patient matches, site performance, and enrollment progress

### Faster Enrollment, Lower Costs, Bigger Impact

- 30-50% lower recruitment costs<sup>6</sup>
- Billions saved in earlier market entry<sup>7</sup>
- Improved access and trial diversity<sup>8</sup>

### Why Sponsors are Racing to AI-Driven Recruitment

- Faster time-to-market for new treatments
- Lower costs and fewer trial failures
- Real-time insights into site and recruitment data
- Less admin work, more time for patient care

**For patients, it means one thing: faster access to life-saving treatments.**

## The Future of Clinical Trial Recruitment Starts Now

Every missed enrollment deadline isn't just a delay – it's a financial hundra and a life-threatening setback for patients waiting on new treatments.

AI-powered recruitment changes that – automating patient matching, removing barriers, and accelerating enrollment so trials stay on track.

## How much faster could your trials move?
