

From Patient Insights to Quality Wins: Empowering Physicians to Act

Data challenges continue to hold back healthcare's transition to value-based care. Leading health plans are tackling this challenge by giving providers clear, easily accessible patient insights to drive better outcomes.

Data Challenges Derailing Value-Based Program Success

75%

Of healthcare professionals cited lack of data interoperability as a primary barrier slowing adoption of value-based care.¹

59%

Of healthcare professionals believe improved data-sharing capabilities with providers would accelerate value-based care adoption.¹

50%+

Of organizations plan to increase investment in technology to better support value-based care contracts.¹

Boosting Value-Based Outcomes With Smarter Tools

Armed with the right technology, health plans can empower their network providers to:

Gain clarity on the metrics that matter, aligning teams and tracking performance across value-based programs.

Power patient outreach with smart, targeted patient lists that highlight care and documentation gaps.

Close care gaps faster with a unified view of quality and risk insights at the patient and measure level.

Case Study: Improving Quality Performance and Operational Efficiency

The need:

A large national health plan with 2+ million members participating in value-based care programs sought to further improve quality outcomes by providing transparency to its 18K physicians.

The approach:

200+ providers in the plan's network used Inovalon's Converged Provider Enablement™ to support quality gap closure across Medicaid and Exchange members.

The results:

84%

Of quality measures in the program demonstrated better outcomes.²

34%

Average increase in compliance rates across measures.²

7%

Average increase in each measure's compliance rate.²

\$2M in operational cost savings²

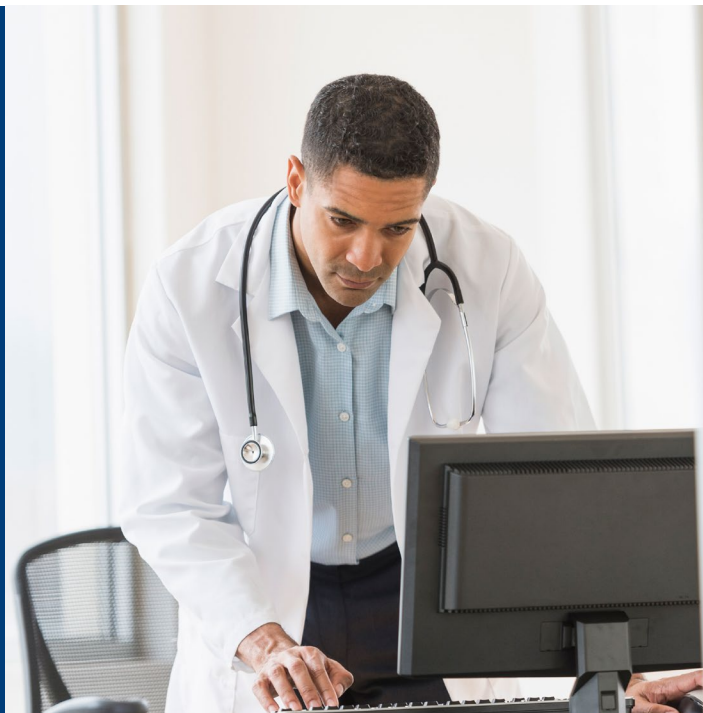

Inform Each Patient Encounter With Actionable Data

Converged Provider Enablement gives payers and providers real-time patient insights and clear next steps to boost quality, reduce costs, and maximize incentives — all within their existing workflow.

Set Your Providers Up for Success

Improve quality outcomes and value-based care performance by giving providers the patient-level data they need.
