

VigiLanz Pharmacy Surveillance

Anticipate, prevent, and address adverse drug events

Pharmacists are facing rising pressure to improve safety, manage stewardship, and cut through manual work. Inovalon's VigiLanz Pharmacy Surveillance™ helps you do it all faster. This clinical solution surfaces the right risks at the right time, so your team can act quickly, reduce harm, and improve outcomes.

Built for clinical workflows and integrated with your EHR, it simplifies medication monitoring, antimicrobial stewardship, and opioid safety. Recognized as Best in KLAS for Pharmacy Surveillance 8 years running, this software is trusted by hospitals nationwide. The Pro version adds advanced tools like IV-to-PO tracking, antibiograms, and analytics for even greater impact.

Advantages for Your Organization

-  **1 | Improve medication safety**
Catch adverse drug events before they happen with near real-time alerts and smart surveillance.
-  **2 | Support faster, safer decisions**
Cut the chart chasing and manual reviews. Review patients faster with rounding views and configurable, auto-prioritized worklists.
-  **3 | Ensure safe and appropriate antibiotic use**
Get timely alerts for drug-bug mismatches, missed or delayed therapies, and de-escalation opportunities backed by microbiology and lab data.
-  **4 | Generate comprehensive metrics and reports**
Access on-demand reports to track interventions, spot trends and be ready for audits and stewardship reviews.

Solution Features

Near real-time medication alerts

Get ahead of harm with alerts for anticoagulants, chemo drugs, duplicate therapies, and lab result changes all in one place.

Strategic opioid stewardship

Support safer prescribing with dose-adjustment alerts tailored to your protocols and standardized rule sets across locations.

Less charting, more care

Cut manual reviews with an intuitive worklist, mobile-friendly interface with rounding tools, and a rule builder that makes updates fast and easy.

Stay ahead of resistance

Track new orders, cultures, and trends in near real-time – plus, get alerts for therapy gaps, drug-bug mismatches, and de-escalation needs.

Catch gaps before they escalate

Access drug use trends, intervention logs, and cost-saving estimates across your enterprise, all available when you need them.

On-demand antibiograms

View trending resistance data to support informed prescribing and stronger stewardship.

Simplified AUR submission

Easily meet Joint Commission and CMS requirements with built-in AU and AR submission tools.

Expand Your Reach With Inovalon's VigiLanz Pharmacy Surveillance Pro™

Get everything in the standard solution, plus:

IV to PO dashboards

Spot conversion opportunities fast, and track savings from missed or completed switches.

Advanced antibiograms

Access on-demand, trending resistance data to support informed prescribing and proactive stewardship.

Embedded EHR activations

See and act on alerts directly in your EHR.

Medication reconciliation workflows

Reduce ADEs with tools helping pharmacists document/resolve medication discrepancies during care transitions.
