

APIs That Actually Deliver: Fueling Smarter Healthcare Software

You've got a roadmap full of big ideas. You don't need any more blockers standing in the way of feature releases.

Inovalon APIs help you simplify and speed up product development.

One API – total access

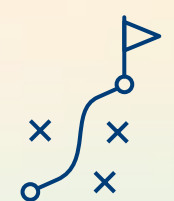

Connect your software to Inovalon's solutions with a single, powerful API built for all-payer claims, real-time insights, and secure communication.

Simplify your stack

Ditch patchwork integrations.

One smooth connection = less headaches, fewer errors, and faster go-lives.

Guide your roadmap with confidence

Cut guesswork with curated delivery options and real-time claims analytics.

Check features off your roadmap and show results that wow your leadership.

Build without breaking things

High-volume, high-availability infrastructure means your product scales without a hitch.

Security you can rely on

SSO-ready and regularly updated for peace of mind (and fewer IT headaches).

Real talk: How Netsmart leveled up

When Netsmart's clients started struggling with claim rejections and slow reimbursements, the team knew their clearinghouse setup wasn't cutting it. They needed a faster, smarter way to integrate revenue cycle capabilities without building from scratch.

That's when they partnered with Inovalon and:

- ▶ Embedded Inovalon's clearinghouse into their EHR
- ▶ Accelerated Medicare clean claims
- ▶ Gave clients insights into Return to Provider (RTP) and Additional Documentation Request (ADR) trends

The result?

Smoother workflows, better financial outcomes, and faster patient access.¹

"It's the tool clients didn't know they needed until they had it."
