

Converged Provider Enablement

Empower providers. Simplify operations. Improve outcomes.

Take the complexity out of value-based care, and the friction out of provider relationships.

Inovalon's Converged Provider Enablement™ is a purpose-built solution for managing value-based care at scale. It supports provider collaboration, surfaces real-time insights, and simplifies workflows — so you can focus on improving outcomes, reducing costs, and driving performance.

With one centralized solution, you get the tools to engage providers, share timely data, and make smarter, faster decisions across your value-based care programs.

Key Benefits

-  | Keep providers in-the-know through data transparency and consistency.
-  | Track value-based metrics with dynamic dashboards.
-  | Align providers and health plans with a holistic view of member population.
-  | Reduce errors and costs with self-service tools, customizable settings, and certify-before-publish workflows.
-  | Seamless implementation for health plans already on the Inovalon ONE® Platform.

The Inovalon Difference

75%+

Of the nation's quality analytics are performed by the underlying platform¹

250+

Measures and metrics to choose from – with the ability to create your own to meet your unique goals²

5M+

Patients supported with value-based care programs²

64K+

Provider performance scores²

50%

Year-over-year provider usage growth rate²

Solution Features

Deliver insights fast

Share patient-level insights and performance metrics with providers via intuitive dashboards with secure, integrated access.

See the full picture

Get a unified view of quality, risk, care management, and utilization performance — down to the provider and patient level.

Customize what matters

Create and share custom measures aligned to your strategic goals, from cancer screenings to surgical outcomes.

Drive provider action

Equip providers with clear goals and timely data to close gaps and advance key initiatives.

Benchmark performance

Compare provider and organizational results against peers and program target.
