

Converged Submissions

Eliminate risk adjustment submission headaches

Risk adjustment teams have the tough task of navigating CMS and HHS updates, complex data formats, and tight deadlines, which can drain resources and put reimbursements at risk.

Inovalon's Converged Submissions™ alleviates these headaches and empowers your team to focus on maximizing returns and minimizing compliance concerns.

Built and maintained by risk adjustment and encounter submissions experts, we anticipate health plan needs and quickly adapt the software to industry changes, so you don't have to worry about keeping up.

Advantages for Your Organization

- 1** |  | **Stay ahead of regulatory changes**
Keep pace with updates and evolving formats from CMS and HHS so you can avoid costly submission errors.
- 2** |  | **Simplify and speed up the submission process**
Make risk adjustment submissions and corrections faster with bulk editing and prioritization.
- 3** |  | **Improve first-pass acceptance and error handling**
Minimize rejections and reduce the manual burden of error handling to save valuable time.

Common Challenges With Submissions

Claims errors resulting
in lost revenue

Costly in-house
programs

Ever-changing federal
and state regulations

Non-compliant data
and claims causing
errors and delays

Simplify the Encounter Submissions Process

Submit faster, easier, and more accurately than ever with encounter submissions software that'll keep your team ahead of current and future regulation changes.

Accurately reflect reimbursement eligibility

Evaluate encounter submissions data before submitting to CMS and HHS, prioritize submissions, and error handling.

Coordinate submissions activities

Always know where every submission stands by tracking reimbursement status with simple dashboards designed for real people, not data experts.

Submit claims faster

Send comprehensive, accurate submissions data to CMS and HHS to avoid delayed payments.

Implement quickly and easily

Created to be fully integrated with Inovalon's Converged Risk™, this self-service submissions software is easily and quickly implemented.
