

Registration Workflow

Simplify front-end revenue cycle tasks and speed care access

Maximize efficiency with one workflow that verifies benefits, confirms demographic details, and finds patient or resident coverage.

With Inovalon's Registration Workflow™, your team can manage exceptions in a single view and spend more time supporting high-quality care.

Advantages for Your Organization

-  **1 Improve cash flow and reduce claims denials**
Avoid missing or incorrect information by using verified data across systems.
-  **2 Quickly identify priority tasks**
Save time and stay focused by using exception reports that highlight high-priority tasks.
-  **3 Use single or batch processing**
Get faster results by uploading individual records in real time or processing batches with results in 24 hours.
-  **4 Enhance registration**
Prevent downstream issues by correcting demographic data early in the revenue cycle workflow.
-  **5 Speed up care access**
Help patients and residents access care faster with quicker, clearer coverage verification.

Who Benefits

Over 50,000 active, licensed customers¹ use Inovalon applications.

Physician practices

Hospitals

Skilled nursing facilities

Billing companies

Rural health clinics

Health systems

Home health organizations

Software vendors

Solution Features

Automated eligibility checks

Run real-time coverage checks to verify benefits and avoid missed reimbursement.

Early coverage identification

Identify primary, secondary, and tertiary coverage early to reduce uncompensated care and speed up care delivery.

MBI lookup and batch checks

Look up MBIs instantly, run batch checks across payers, and get alerts when other coverage is detected.

Exception-based profile updates

Use alerts to resolve data issues and maintain accurate records.

Customize workflows

Create search rules and set exclusions to avoid false matches and narrow down results that matter. Assign any remaining tasks to team members for completion.

Change report and dashboard

Identify changes in eligibility, easily monitor outstanding alerts or tasks, and quickly view transaction volume.
