

ScriptMed Specialty

Fast-track prescriptions for critical patients

Imagine letting pharmacists focus on patient wellbeing, while your pharmacy management system works behind the scenes to automate tedious workflows. Gain total visibility into your operations and each patient's journey, so nothing falls through the cracks.

Inovalon's ScriptMed® Specialty™ is a single, end-to-end solution that eliminates manual burdens. Quickly scale with more LDD programs and payer networks to reach more patients faster.

Advantages for Your Organization

1

Remember only one login

Power every task and function of your operations from start to finish within one system.

2

Create your own workflow

Scale your operations with the only solution in the market with flexible, persona-based workflows.

3

Make fast, informed care decisions

Access the industry's largest primary source dataset to deliver the right care at the right time.

4

Meet reporting requirements

Achieve regulatory compliance and meet payer and manufacturer reporting requirements to support your pharmacy's growth.

Solution Modules

Referrals

Use flexible intake workflows to capture essential clinical and financial information aligned to payer and pharma requirements.

Clinical Care

Build and deliver care plans with flexible, rule-based protocols centered around the patient.

Order Management

Prioritize and process orders based on patient need – while routing exceptions and syncing clinical, operations, and financial data.

Fulfillment

Speed up picking, labeling, quality checking, packing, and shipping of orders using 2D barcode scanning.

Inventory

Support the purchasing, stocking, and movement of drug inventories across multiple pharmacy locations with perpetual inventory tracking.

Revenue Cycle Management

Access pricing, billing, deposit management, cash applications, and collections for patient medications, supplies, services, and funding assistance.

Reporting and Visualization

Turn data into action with real-time dashboards to make informed clinical, operational, and financial decisions.

Infusion Management

Manage complex drug compounding, parenteral nutrition, scheduling, equipment, and supply tracking for every infusion model – home, site of care, or specialty.
