

# VigiLanz Audit Management Pro

## Smarter audits powered by strategic insights

Drive smarter decisions, reduce risk system-wide, and scale your audit program with confidence. Inovalon's VigiLanz Audit Management Pro™ delivers the tools data-driven quality leaders use to turn audits into strategic insights, like autogenerated cases, exportable data, and advanced dashboards. It's everything you need to move beyond tracking and start leading with impact.

## Advantages for Your Organization

-  **Autogenerate recurring audits**  
Free staff from repetitive setup and reducing missed reviews with logic that you build once, and then the system creates cases automatically.
-  **Export audit data with ease**  
Fuel cross-team collaboration, support executive reporting, and meet documentation needs fast from structured audit results made in easy, sharable formats.
-  **Uncover deeper trends and outliers**  
Pinpoint recurring gaps, track performance by unit or provider, and monitor audit activity in near real-time with advanced dashboards.
-  **Scale audits across departments**  
Support larger, multi-team audit programs with visibility controls, flexible templates, and cross-functional dashboards.

## The Inovalon Difference

Transform audits into a strategic advantage, reducing missed gaps, accelerating interventions, and aligning teams across departments. VigiLanz Audit Management Pro empowers healthcare organizations to lead with data, not just to meet requirements. Powered by the Inovalon ONE® Platform, it delivers autogenerated audits, advanced dashboards, and simple data exports so you're always prepared, whether for TJC or internal performance improvement

## Solution Features

VigiLanz Audit Management Pro includes all the functionality of the standard version, plus get advanced tools designed for quality leaders who need deeper insights and broader reach.

### Advanced dashboards

Visualize audit performance, filter by unit or timeframe, and track outcomes over time to spot trends fast.

### Audit data export

Export structured audit data for internal reporting, board presentations, or cross-department initiatives.

### Multi-team support

Coordinate audit activity across departments with visibility controls, shared dashboards, and role-based access.

### Flexible logic and templates

Configure audit rules based on patient events, timing, or other prioritized criteria, then deploy consistent templates across teams, facilities, or audit types to simplify workflows and reduce rework.

### Scheduled reports

Automate report delivery to keep teams aligned and ensure leadership always has up-to-date insights.

### EHR integration

Pull patient data directly from your clinical systems to ensure audits are accurate, timely, and complete.
