

VigiLanz Audit Management

Simplify audits and improve care outcomes

Smarter, faster audit workflows start here. With near real-time visibility into compliance, quality teams can track audits, catch care gaps early, and stay survey-ready all from one centralized dashboard.

Inovalon's VigiLanz Audit Management™ automates case identification and simplifies tracking, so you can stop chasing paper and start focusing on what matters: better outcomes and stronger oversight.

Advantages for Your Organization

-  **Automate daily audit tracking**
Cases are populated automatically based on your criteria, eliminating manual entry and reducing time spent preparing for reviews.
-  **Catch gaps before they affect care**
Quickly identify noncompliance issues like missed documentation or overdue assessments with near real-time alerts.
-  **Use audit data to drive improvement**
Conduct targeted interventions with custom dashboards that surface trends in readmissions, HAIs, or discharge delays.
-  **Stay ready for accreditation at any time**
On-demand and scheduled reporting makes it easy to compile documentation for TJC, CMS, and internal quality audits.

The Inovalon Difference

Hospitals using VigiLanz Audit Management have reclaimed hours of staff time, improved audit readiness, and strengthened oversight without spreadsheets or manual workflows. The solution delivers a faster path to quality and compliance through near real-time alerts, configurable dashboards, and autopopulated audit cases, all powered by the Inovalon ONE® Platform and integrated directly with your clinical systems.

Solution Features

Deliver safer care, reduce risk, and stay survey-ready without the burden of manual audit tracking. VigiLanz Audit Management equips quality teams with built-in tools to manage audits efficiently and uncover care gaps before they escalate.

Key features include:

Automated and flexible case worklist

Cases are created automatically based on prioritized tasks and predefined criteria, saving time and reducing manual data entry.

Configurable audit forms

Tailor reports and audit forms to meet specific organizational or regulatory requirements, no one-size-fits-all templates here.

Contingency logic

Only show relevant fields based on previous inputs, keeping workflows clean and audit forms easy to complete.

Clear, detailed audit dashboards

Get near real-time visibility into audit performance, care gaps, and team activity from one centralized dashboard.

Random sampling tools

Easily apply random sampling rules to your audit population for statistically valid quality reviews.

Secure integration with EHRs

Pull key patient data directly from your clinical systems to keep information accurate, timely, and complete.
