

From Reactive to Proactive: How Inovalon Transforms Infection Prevention Workflows

Infection prevention never stops, from before the sun rises to long after dark. Each day brings new challenges, detours, and critical decisions. You never know what you’re walking into. But with the right technology, your team can stay ahead.

EHRs don’t tell the whole story, and infection preventionists need more than lab results and delayed reports. [Inovalon’s Vigilanz Infection Prevention™](#) delivers near real-time surveillance, smart alerts, and unmatched support so you can intervene faster and deliver better outcomes.

As one of our infection prevention experts - who works hands-on with customers every day - shares:

Inovalon has significantly improved infection preventionists’ daily routines by providing timely, prompt alerts and leveraging near real-time data.

- Jennifer Cordell, Med., CIC,
Infection Prevention Director,
Inovalon

Task	Without Inovalon	With Inovalon
Start of day – patient surveillance	Pull reports manually, cross-check EHR and paper logs	Prioritize with auto-populated rounding list and near real-time alerts
HAI prevention and device monitoring	Limited to spot checks; tracking is inconsistent	Near real-time alerts for device maintenance and isolation compliance
Case investigation	Manual chart review, keyword search in EHR	Smart surveillance across labs, diagnoses, keywords, and events
Team communication	Phone calls, emails, delays	Immediate notifications to frontline staff
Data analysis and reporting	Wait on analyst; manual report builds	Self-service access to near real-time, customized reports
Intervention documentation	Notes in different systems, sometimes delayed	Centralized, easy documentation embedded in workflow

Top-tier client support from real IP experts – so you’re never alone, and never playing catch-up.

Unlike many solutions that only focus on positive lab results and microbiology data, we explore lots of avenues to ensure that clients are alerted based on their specific data, maximizing our functionality.”

- Jennifer Cordell, Med., CIC,
Infection Prevention Director,
Inovalon
