

# VigiLanz Quality Management Starter

## Safer care starts here

Start strong with near real-time clinical surveillance that helps your team detect patient risks sooner, respond faster, and improve care outcomes. Inovalon's VigiLanz Quality Management Starter™ delivers core capabilities like automated sepsis detection, timely acuity monitoring, and guided workflows – making it easy to act early and drive patient safety and quality improvement from day one.

## Advantages for Your Organization

-  **1 Improve outcomes sooner**  
Catch signs of sepsis and deterioration early before they escalate.
-  **2 Reduce manual effort**  
Automated alerts and guided workflows keep staff focused on patients, not paperwork.
-  **3 Strengthen quality programs**  
Track key indicators and support compliance with built-in tools.
-  **4 Empower care teams**  
Deliver data-backed insights that help clinicians act with confidence.

## The Inovalon Difference

Improve patient safety and quality with fewer resources – no complex setup required. Built for fast-paced hospital teams, this flexible solution delivers timely data and clinical insights that help you act quickly and confidently. Powered by the Inovalon ONE® Platform, it all comes together with Vigilanz Quality Management Starter.

### Core Capabilities That Deliver

#### Sepsis workflow

Identify and manage at-risk patients in near real-time with an automated list that supports early intervention.

#### MEWS dashboard

Track early warning scores to catch signs of deterioration before they escalate.

#### Near real-time alerts

Get timely, rules-based notifications to help clinicians act faster and reduce delays in care.

#### Automated data capture

Eliminate manual documentation with built-in tools that pull data directly from your EHR.

#### Guided clinical workflows

Support consistent, evidence-based care with prebuilt workflows designed for quick adoption.

#### Visual dashboards

Give staff a clear, at-a-glance view of key risks, trends, and patient status.

#### Minimal IT lift

Easily implement and maintain with a lightweight solution that integrates smoothly into hospital systems.
