

BUYER'S GUIDE

2025 Quality Improvement Planning

Overview

A Better Way To Improve Outcomes

For today's quality leaders, the stakes have never been higher. You're expected to reduce adverse events, improve patient safety, and hit complex compliance targets – often with limited staff, siloed data, and outdated tools. **This guide is built to help you change that.**

Inside, you'll discover how near real-time surveillance, rule based, AI-driven alerts, and automated workflows can help your team act earlier, reduce errors, and strengthen compliance without adding to the burden. See how hospitals like yours are using **Inovalon's VigiLanz® Quality Management™** to catch more risks, intervene faster, and raise the bar on care.

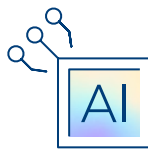

Inovalon's VigiLanz Quality Management

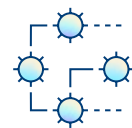

**Near real-time
surveillance**

Act earlier

**Rule-based
AI-driven alerts**

Reduce errors

**Automated
workflows**

Strengthen compliance

What's Holding Quality Teams Back?

Risk signals

buried in fragmented
systems

Delayed detection

of conditions like sepsis and
glycemic events

Alert fatigue

and white noise
from EHRs

Overwhelming

manual tracking and
reporting tasks

Burnout

from resource-heavy
compliance work

What Modern Solutions Look Like

1 Near real-time risk detection

Detect early signs of sepsis, glycemic events, or patient deterioration before they escalate. VigiLanz Quality Management delivers continuous surveillance and custom alerts that help teams act fast – and with confidence.

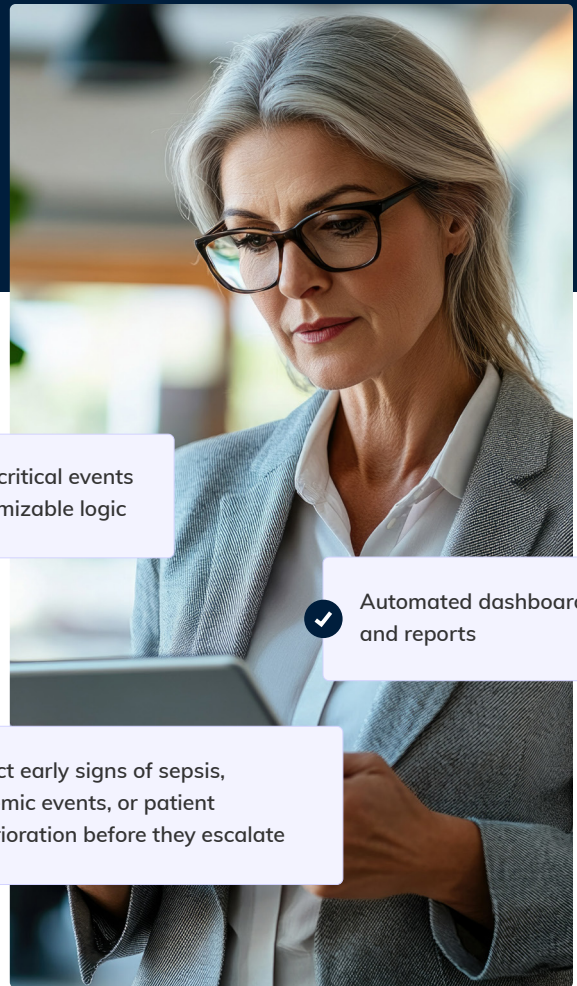

Prioritizes critical events with customizable logic

Automated dashboards and reports

Detect early signs of sepsis, glycemic events, or patient deterioration before they escalate

2 Actionable AI - not just more alerts

Skip the noise. Inovalon's rule-based engine to prioritizes critical events with customizable logic – so your team only sees what truly matters.

3 Smart compliance, less busy work

Say goodbye to chasing data for CMS and Joint Commission audits. Automated dashboards and reports save time and help prove value faster.

What You Get With VigiLanz Quality Management

1 Sepsis worklist

Quickly flag at-risk patients using 150+ customizable rules. Track protocol compliance and time-zero interventions in one view.

2 MEWS dashboard

Near real-time visibility into patient acuity changes. Follow changes in vitals, organ function, and more using a smart, centralized view.

3 Glycemic event management

Automated alerts for hypoglycemic and hyperglycemic events. Intervene quickly and manage insulin, nutrition, and recovery time with precision.

4 Built-in compliance tools

Turn reporting into a strength. Track quality metrics and compliance standards without pulling data manually. Dashboards are ready when you are.

Real stories, real impact

At Goshen Health, recognizing early signs of sepsis was a persistent challenge. That changed with Inovalon. With automated alerts and near real-time surveillance, clinicians intervened faster – improving outcomes, reducing mortality, and giving staff greater confidence in their ability to act swiftly and effectively.

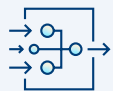

We continue to see opportunities for improving timely treatment for severe sepsis and septic shock patients. The benefit of VigiLanz Quality Management is that it continuously runs, doesn't rely on manual processes, and helps us achieve better outcomes.”

— Manager of Clinical Informatics,
Goshen Health

Integration, Implementation, and Training

Don't settle for a solution that drains your team's time or IT resources. Your quality management system should work for you – easily integrating, adapting, and including the support you need to succeed.

Effortless integration

Plug into your existing systems with ease. The solution integrates with your EHR and pulls from multiple data sources, medication orders, lab results, pharmacy activity, and more, for a full clinical picture.

Flexible configuration

Your workflows, your way. Tailor dashboards, alerts, and communication flows to fit your existing processes, not the other way around.

Built-in security

Feel confident in your compliance. With enterprise-grade encryption, role-based access, third-party attestations, and ongoing vulnerability testing, your data stays protected.

Support you can count on

A partner, not just a software. Work with a healthcare-experienced support team that knows your world and responds quickly – whether you need help customizing forms or expanding your capabilities.

Training that fits

Get up to speed fast and stay there. Live and on-demand training modules make it easy for both new hires and seasoned staff to master the system.

Why Inovalon

1 Trust

Trusted by hospitals, from community to enterprise systems.

2 Work

Work as an extension of your team, without adding to your workload.

3 Success

Proven success in reducing mortality, readmissions, and compliance risk.

4 Impact

Built by clinicians. Made to maximize your impact.

Quality improvement shouldn't mean more complexity. With VigiLanz Quality Management, you get the insights, automation, and support to act sooner – and improve outcomes across the board.

Let's talk about how we can help.
