

MDS Intelligence

Confident submissions, every time

Reduce errors, protect reimbursement, and stay survey-ready with less stress. Our MDS assessment software validates data early, aligns CMI with staffing levels, and files directly to CMS with confidence.

Automated flags catch issues before deadlines, near real-time dashboards give visibility into resident acuity and nursing hours, and integrated iQIES submission ensures fast, accurate transmissions. That's the power of Inovalon's MDS Intelligence™ – helping your team spend less time on corrections and more time delivering care.

Advantages for Your Organization

- **1** | **Reduce errors**
Automated checks flag issues before submission deadlines.
- **2** | **Save time**
Unlimited uploads and dashboards eliminate manual rework.
- **3** | **Stay survey-ready**
Confidently align reporting with CMS requirements.
- **4** | **Protect revenue**
Ensure CMI accuracy to match reimbursement with care provided.

The Inovalon Difference

Unlike generic tools, this MDS assessment software is built for skilled nursing facilities. It integrates directly with CMS iQIES for faster, more accurate submissions, while leveraging the Inovalon ONE® Platform for seamless connectivity across systems. This ensures your facility can simplify reporting, reduce errors, and maintain confidence in every submission.

Solution Features

Validate data early

Unlimited uploads and automated flags catch errors before deadlines.

Gain near real-time visibility

Dashboards connect resident CMI to nursing hours for stronger compliance.

File with confidence

Submit directly to CMS through integrated iQIES for fast, accurate transmissions.

Strengthen compliance

Stay aligned with CMS expectations and survey-ready every quarter.

Simplify workflows

Automated checks and validations reduce manual review and rework.

Save staff time

Coordinators spend less time on data cleanup and more time supporting care teams.

Defensible reporting

Document rationale and coverage decisions with clarity for auditors and surveyors.
