

Payroll Based Journal Submission

Accurate, compliant CMS reporting

Stay ahead of CMS deadlines and avoid compliance headaches with Inovalon's Payroll Based Journal Submission™. This software helps skilled nursing facilities catch staffing data errors early, align hours with resident CMI, and submit reports directly to the QIES portal. Unlimited uploads mean you can update and validate data as often as needed – long before deadlines hit.

With integrated dashboards linking staffing to resident needs, you can justify coverage decisions and stay survey-ready year-round. Turn quarterly PBJ submissions from a reactive scramble into a confident, proactive process that supports both compliance and quality care.

Advantages for Your Organization

1

Catch errors early

Spot inconsistencies in staffing data long before CMS deadlines.

2

Align staffing to CMI

Connect nursing hours to resident needs for better shift coverage decisions.

3

Submit with confidence

Your PBJ data will be accurate, accessible, and on time.

4

Stay survey-ready

Support compliance and protect your facility's reputation year-round.

The Inovalon Difference

Keep staffing data accurate and up to date well before submission deadlines with unlimited PBJ report uploads. Get the data you need to make smarter, faster decisions with resident CMI linked to nursing hours, and make fast submissions with a direct connection to the QIES portal.

For more capabilities, connect to Inovalon's MDS Intelligence™ for advanced CMI insights that help align coverage and meet CMS expectations with coverage.

Who benefits:

Skilled nursing
facilities

Nursing-led staffing
coordinators

Compliance and
quality teams

Solution Features
