

RCM Intelligence

Lead the way with a smarter, data-driven revenue cycle

Revenue cycle teams juggle data from multiple systems making it difficult to spot trends, resolve bottlenecks, or forecast performance with confidence. Inovalon's RCM Intelligence™ gives you a unified view of your entire revenue cycle that delivers both the day-to-day visibility to address issues quickly and the strategic insights to drive better performance improvement.

Compatible with any clearinghouse, it gives your entire team the clarity needed to optimize cash flow and drive measurable growth. Get clear, actionable data that helps eliminate revenue roadblocks, predict cash flow, and drive financial excellence. No more spreadsheet tracking or fragmented reports.

Advantages for Your Organization

-  **1 Know where you stand**
Understand the real-time health of your revenue cycle through combined claims, remittance, and workflow data.
-  **2 Make data-driven moves**
Eliminate preventable revenue losses with detailed denial source insights.
-  **3 Negotiate smarter**
Facilitate better payer negotiations with data on payer-specific denials, reimbursement, and turnaround times.
-  **4 Free up your team**
Stop manual reporting; identify repetitive work and automate tasks that let your team focus on higher-value work.
-  **5 Get paid quicker**
Pinpoint areas of revenue leakage and reduce A/R book and aging through payer performance monitoring.

Who Benefits

Physician practices

Hospitals and Health systems

Post-acute care

Billing companies

Rural health clinics

Behavioral health

Outpatient clinics

Software vendors

Solution Features

Performance dashboards

Track how you're performing across the entire revenue cycle so you can identify what's working and where to focus next. Gain instant visibility into key revenue metrics and provide executives with the data they need to truly understand organizational revenue performance.

Scorecard dashboards

Uncover potential workflow problems and drive continuous process improvements. Easily track denials by type and payer-specific denial categories to help strengthen denial prevention and payer performance.

Cash projection tools

Plan ahead with more confidence by forecasting cash flow based on historical payment data. Visualize expected reimbursement volumes and details to minimize surprises and support better financial decisions.

Denial analytics

Break down the most common denial categories by payer or financial class. Identify patterns in eligibility issues, coding errors, and custom edits so you can fix problems upstream and reduce rework.
