

UB Submission

Submit clean claims with confidence

If you've ever held your breath after hitting "submit," you're not alone. Billing errors and mismatches between the MDS and UB-04 can slip through the cracks, leading to denials, delayed payments, or even audits. That's time, money, and energy pulled away from care for residents.

Inovalon's UB Submission™ changes that. Get a built-in safety net with automated triple check and MDS-to-UB matching that catches errors before they leave your desk. Claims go out audit-ready the first time – protecting revenue, reducing risk, and giving you the peace of mind that your hard work won't come back to haunt you.

Advantages for Your Organization

1

Get paid on time, every time

Eliminate costly delays by catching errors and MDS mismatches before claims ever reach CMS.

2

Lower your audit stress

Protect your facility from takebacks, penalties, and RAC reviews with audit-ready claims.

3

Free your staff from paperwork panic

Simplify the triple check process with automated MDS-to-UB matching so nurses and billers can focus more on residents, not chasing mismatches.

4

Protect your bottom line

Prevent lost revenue by catching documentation and coding issues before auditors do.

The Inovalon Difference

You're not just getting software; you're gaining a partner who understands the realities of skilled nursing. Our solutions are built with nurses in mind, simplifying the triple check process and claims submission without slowing down care.

Behind the technology is a team of seasoned clinicians and billing experts who know the pain points because they've lived them. With hands-on training, responsive support, and ongoing education, your staff feels confident using UB Submission from day one.

Get stronger support from a partner who is just as committed to protecting your residents and your revenue.

Solution Features

Automated triple check reviews every UB-04 claim line-by-line and flags discrepancies before they leave your desk.

MDS-to-UB matching aligns clinical and financial records in near real-time to stop mismatches that trigger denials and audits.

RAC review tools catch the documentation gaps auditors look for, helping you avoid penalties and takebacks.

Configurable near real-time alerts flag issues so you can resolve them quickly and keep claims moving.

Perfect integration with Inovalon's MDS Intelligence™ strengthens both patient care and financial accuracy by connecting assessments with claims data.
