

Medical Record Location

Accurate record retrieval without the guesswork

Medical record retrieval shouldn't be a guessing game. Endless calls, emails, and incomplete information slow workflows, increase costs, and create compliance risks. With delays and inefficiencies costing millions annually, the need for a faster, more accurate solution has never been greater.

Inovalon's Medical Record Location™ eliminates the frustration by instantly identifying where patient records are stored. Pinpoint the correct healthcare provider and facility on the first try to reduce delays, automate manual tasks, and ensure faster, more accurate record retrieval.

Benefits for Your Organization

-  | Eliminate wasted time spent on contacting multiple providers.
-  | Reduce frustration from incomplete or inaccurate records.
-  | Speed up workflows by cutting retrieval time from weeks to hours.
-  | Prevent gaps in patient history that could impact legal cases.
-  | Minimize administrative workload by automating manual processes.
-  | Strengthen client trust with reliable record location identification.
