

Converged Risk

Leave audit worries in the rear-view mirror

Risk adjustment programs are more complex than ever, with escalating regulatory pressures, the looming threat of audits, and the constant challenge of accurately capturing your population's risk.

Inovalon's Converged Risk™ provides a clear line of sight across your risk adjustment program. It gives health plans the visibility and control to catch gaps early, manage audits confidently, and improve both member outcomes and performance.

gap visibility

Better health
outcomes

Benefits for Your Organization

1

Reduce Audit Risk

Protect your health plan from costly penalties by catching over-coded conditions before and after submission.

2

Improve Risk Score Accuracy

Uncover hidden gaps and ensure full reimbursement for your members' risk burden with complete visibility to every step of the process.

3

Control Chronic Conditions

Ensure members with chronic conditions get the care they need to stay healthy, improving their outcomes and your health plan's performance.

Solution Features

Take the guesswork out of your risk adjustment program. Identify incomplete or improperly reflected member diagnoses in your claims data systems and abstracted medical records.

Features include:

Improved Reporting and Documentation

Use HCC surveillance analytics to identify potentially over-coded conditions with associated clinical evidence.

Data-Driven Intervention Planning and Execution

Implement proven education and multi-channel intervention strategies that support comprehensive patient assessment and accurate documentation.

Predictive Analytic Insights

Create your own cohorts and run predictive gap identification and intervention planning analytics on demand.

Compliant, Accurate Regulatory Submissions

Proactively manage claims processing at various stages throughout the submissions process and monitor the financial impact of claims.
