

One Place, First Time: Get Coverage and Patient Data Right

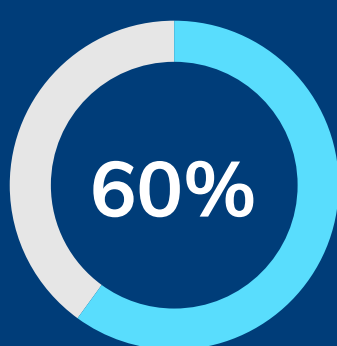

Registration Workflow · Product Spotlight

Lead With Confidence From Day One

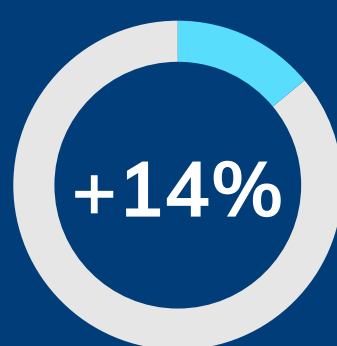

When insurance is missing or patient data is off, teams are left fixing issues after the fact. With Inovalon's Registration Workflow™, you can find insurance coverage and verify demographics in one place without bouncing between systems or changing your workflow.

When Used Together

Percentage of patient records corrected in real time before the encounter¹

Increase in hit rates on insurance when teams run both checks together¹

Ditch the guesswork. Find it all in one place.

Uncover previously unknown insurance information and correct missing or inaccurate demographic data simultaneously, without switching systems or changing how your team works.

Inside Registration Workflow

<5 seconds

3 checks.

1 click.

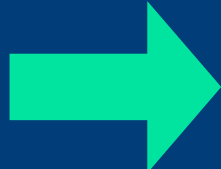

Under 5 seconds.

Hit a single button to verify eligibility, find missing coverage, and validate patient data – all at once, in under 5 seconds.

What Runs With One Click

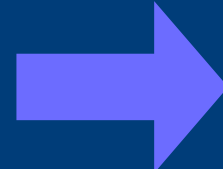

Eligibility Verification™

Confirm active coverage in real time

Insurance Discovery

Find unknown coverage across all payers

Demographic Verification

Validate patient data against credit bureaus and other trusted records

Why It Matters

No new workflow to learn

Works inside Registration Workflow, so staff stay in tools they already know

Catch both before the encounter

Insurance gaps and demographic errors resolved upstream before claims are touched

Single view, all data

One centralized patient profile with full verification history, no system-hopping

Get Coverage and Patient Data Right the First Time

See how your team can find missing coverage, verify demographics, and catch registration issues before they turn into downstream revenue problems.
