

Save Time and Gain Efficiency with Curated Data Extracts

Curated healthcare data extracts primary-sourced from:

170M+

UNIQUE COVERED LIVES OVER 5 YEARS

47M+

COVERED LIVES WITH RACE AND ETHNICITY INDICATED

150+

PAYERS

MAKE A NEW DISCOVERY

Spend more time analyzing your data - uncovering new patterns and trends and exploring causal relationships.

SAVE TIME

Spend less time wading through original datasets defining, filtering, and configuring limits to create data extracts specific to your needs.

GAIN EFFICIENCY

Experience better system and software performance with less total data and fewer processing requirements.

CONDUCT RESEARCH WITH THE CONFIDENCE THAT YOUR DATA IS ACCURATE, RELIABLE, AND REPRESENTATIVE.

Data Summary at a Glance

CONDITION: HEPATITIS

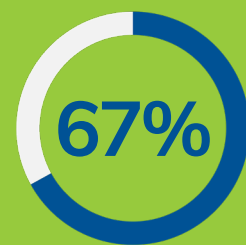

WHY IT MATTERS?

PEOPLE IN THE UNITED STATES LIVE WITH HEPATITIS

OF PEOPLE WITH HEPATITIS C DON'T KNOW THEY HAVE IT

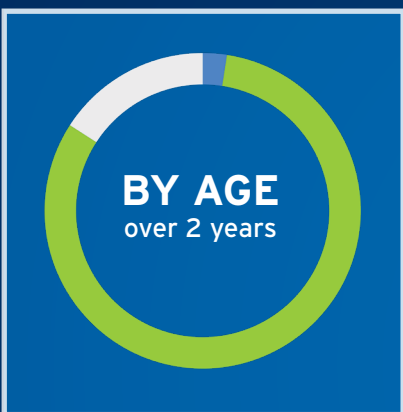

OF PEOPLE WITH HEPATITIS B DON'T KNOW THEY HAVE IT

INSIGHTS DATA SUMMARY

2,070,176

Total number of patients with Hepatitis over a 2-year lookback

- 50,341**
Ages: 0-17
- 1,671,417**
Ages: 18-64
- 348,418**
Ages: 65+

- 1,020,730**
Female
- 1,049,446**
Male

- 62,198** | Asian
- 195,472** | Black
- 116,411** | Hispanic
- 81,853** | Other
- 517,798** | White

All data extracts include: AHRQ-defined clinical diagnosis, Race/Ethnicity, Gender, NPI, Financial Benchmarks, and a Geographic Identifier, with representation across all 50 states + DC and Puerto Rico.
